Regarding: Organizing and establishing a central world army

Good day, ladies and gentlemen!

I am working on organizing and establishing a central world army.

After everything is completed, all national militaries on Earth will be disbanded.

It will take several years and we must start now.

This is the only way for everyone to save resources.

Resources that our successors will need to survive.

The military and defense industries consume more than 30% of the earth's raw material resources.

A central army would be able to ensure lasting peace on earth and would only use about 5% of the resources.

There is a lot to discuss and everyone can do that together, but not now!

I need to know now who wants to join and who isn't interested!

Be sure to reply and let me know your decision!

All future investments and business activities in your country would depend on this.

Do not be afraid of the states that have weapons of mass destruction!

I or my successors will disempower and disarm them all!

From now on we take responsibility for our planet!

Absolutely all powerful states are disempowered.

But everyone may or may not work with us!

Best wishes

Bojidar Garkov
